

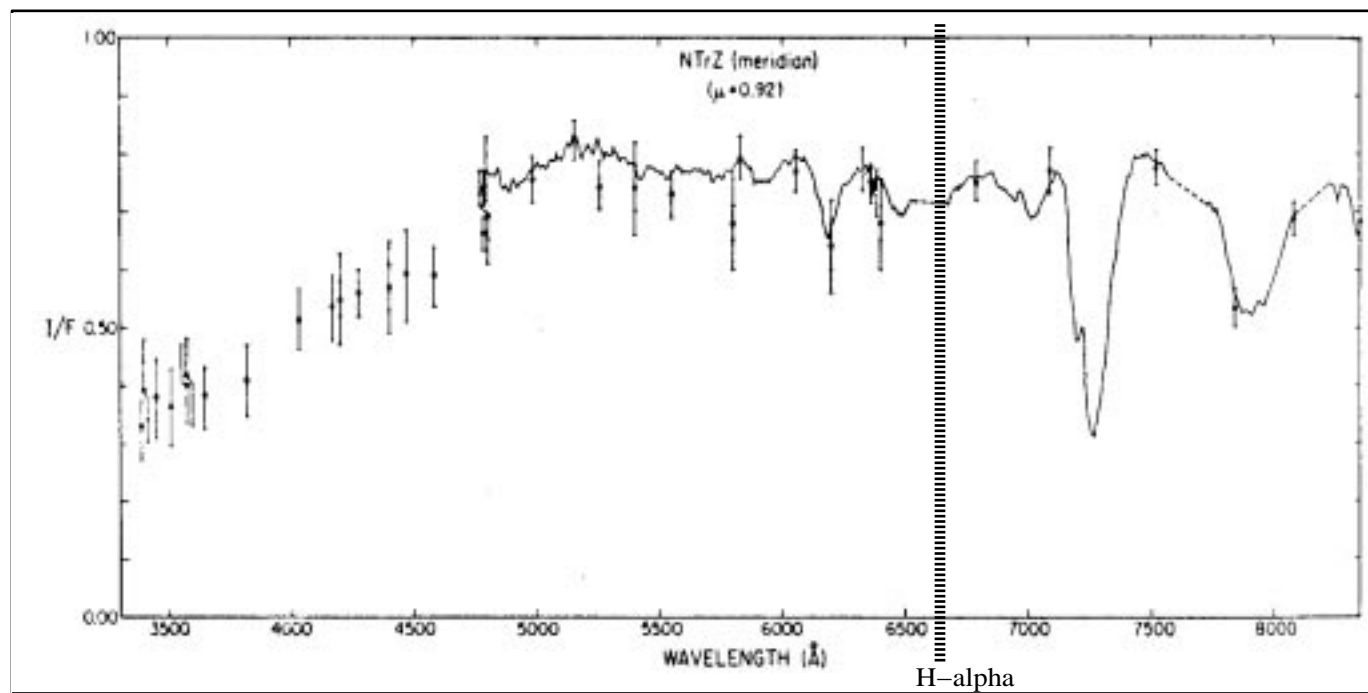

**Figure 5-A**

From Orton (1975). Measured absolute spectral reflectivity of the South Tropical Zone near the meridian. Vertical bars represent estimates of observational errors. We took the reflectivity value at H-alpha to be 0.77 (+/- 0.01).

**Figure 6-A**

From Orton (1975). Measured absolute spectral reflectivity of the North Tropical Zone near the meridian. We took the reflectivity value at H-alpha to be 0.73 (+/- 0.01).
