

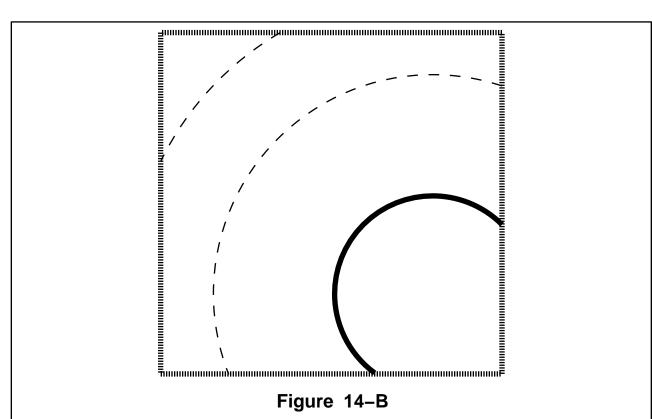

Figure 13-B

A magnified portion of a raw (uncalibrated) SMM C/P image (23:50 15 April 1980) showing the effects of high frequency noise. Note the vertical bands in the image. Also visible is the "hair" artifact (see Figure 7.

A Graphical representation of the occulting disk edge (innermost arc with the solid dark line) and the inner and outer edges of the Lyot ring (slightly enhanced optical brightness), which are indicated by the dashed arc lines.
