Table 1-C

Legend for data columns :

**image file** format : yydddhhmm.cxx, yy=year, ddd=day of year, hh=hour, mm=minute,  
c=>calibrated, xx=sector position;

**X Y** : vidicon position.

**Brightness** : (B/Bsun);

**radius** : (R/Rsun);

**vignet** : vignetting attenuation factor.

**O (ave bkg)** : average brightness (B/Bsun) per pixel in "background" region.

**(Imax-O)\*v** : brightest pixel brightness, less background, corrected for vignetting.
